**“The schizophrenia-associated  
3q29 deletion:  
when genetics and psychiatry meet”**

Jennifer Gladys Mulle, PhD  
Associate Professor  
Department of Psychiatry  
Department of Neuroscience and  
Cell Biology  
Robert Wood Johnson Medical School  
Rutgers University

The 3q29 deletion, with its 40-fold increased risk for schizophrenia, is a high-value target for understanding the molecular and cellular insults that lead to schizophrenia. I will discuss results from deep phenotyping and neuroimaging of human subjects, as well as cutting edge molecular neuroscience data.

Noon, Monday, October 2, 2023  
Life Sciences Building | Auditorium | 145 Bevier Road, Piscataway, NJ
