

## **GENETICS 203: HONORS COMPUTATIONAL GENETICS**

### **Class time**

This course will be held **synchronously**, which means that all students are expected to join via Zoom with webcams on during class periods: Mon/Thurs 9-11:30AM. Note that the majority of each class (1 – 1.5 hours) will be reserved for students to work on their homework and discuss issues/problems via breakout rooms

### **Assignments**

Homework will be assigned during each class period and will be due the following period. Quizzes will be assigned periodically and there will be a single midterm and a final exam, both of which are open book/notes.

### **Technology**

Any laptop or desktop computer that allows you to access the internet and use Zoom should be fine for this course. All computation will be performed on a Rutgers computer cluster that can be accessed via a web browser.

### **Assistance**

Dr. Ellison will be available during class and via one-on-one meetings (made by appointment) for help. The TA will hold office hours via Zoom twice a week. Students are also encouraged to work together and help each other during class and via Zoom and/or Canvas.
